Evolving with You

*Add Luxury
to Your Room*

Creative Quartz LLP embraces tradition while creating a fascination for the new and has developed into an integral part of the Jennex Group of Companies which has been a force in the natural stone industry for over two decades. The interplay between experience and passion, insight and curiosity drove us to manufacture engineered quartz surfaces. While adapting to current market trends, we aren't just creating a product but life-inducing forces suitable for any of your projects.

NSR

Our Story

Creativity is effortless when you have a passion for what you are doing. Even after being in the natural stone industry for over 20 years, it is this love for creativity that keeps us excited and driven as ever.

Our 200,000 sq. ft. production facility located just outside of Delhi is well equipped to service our global clientele not only high quality quartz surfaces but top notch service. From full slabs to pre-fabs, commercial to residential and cut-to-size to all cladding, our 150 person team has the ability to supply all of your engineered quartz needs.

With a constant drive to fulfill all the demands of our clientele, research and development is the true backbone of our operation. Continuous investments in our R&D team have given us the freedom to evolve our product offering, catering to the needs of our clients and helping realize their dream quartz surfaces.

Area
200,000 Sq. Ft.

Annual Production Capacity
5,000,000 Sq. Ft.

We believe that creativity doesn't end at ideation, but it is the very process itself. Whether we are mixing the raw materials, moulding or giving the surface a finish, every little detail counts. At Creative Quartz, we treat each unfinished slab as an art in-the-making. Our team understands that what we are crafting here is going to be a part of someone's dream house, their prized office or the very reason to call a space their favourite. We put heart and soul into what we do so when you touch or look at a piece by Creative Quartz, you're looking at a feeling made with great care and passion.

Natural Stone Resources—Our Partners at Creative Quartz

Natural Stone Resources is the United States based partner of Creative Quartz, investing in the factory and operations in 2017 to help increase production capacity and expand the distribution network. Creative Quartz' partnership with NSR thrives on shared values and an unwavering desire to deliver the highest quality and innovative quartz surfaces to our customers around the world. Creative Quartz has incorporated NSR's core values of superior quality, service and integrity into every aspect of its operation. From the selection of raw material to the entire production process, NSR is wholeheartedly involved with Creative Quartz from manufacturing to final delivery.

As a trusted name in the US market, NSR is the answer to all your natural stone and quartz surface needs across North America. Based in Anaheim, CA and a distribution network across the United States, Canada and Mexico, NSR has a rich portfolio of natural stone from over 17 countries and is the go-to stop for tiles, slabs, mosaics, trims, cut-to-size and many other formats in slate, quartzite, sandstone, marble, granite, travertine, limestone, onyx and quartz surfaces. NSR can provide direct container shipments to your facility around or ship from their distribution center in Southern California.

With an emphasis on customer service and satisfaction, NSR truly believes the Customer is King molding the supply chain to the very needs of the customer. Regardless the size of the order, NSR can guarantee you and your staff will be treated with the utmost of professionalism and respect with delivery of the highest quality product.

Natural Stone Resources investment in Creative Quartz is a thoughtful engagement born out of an idea to produce an international standard of quality and service along with spreading the global distribution network.

Stock Yard

In order to maintain the high standards that we are recognised for, our quality control team begins with the selection and inspection of raw materials before overseeing all processes, including the fully automated process of manufacturing.

Why Quartz

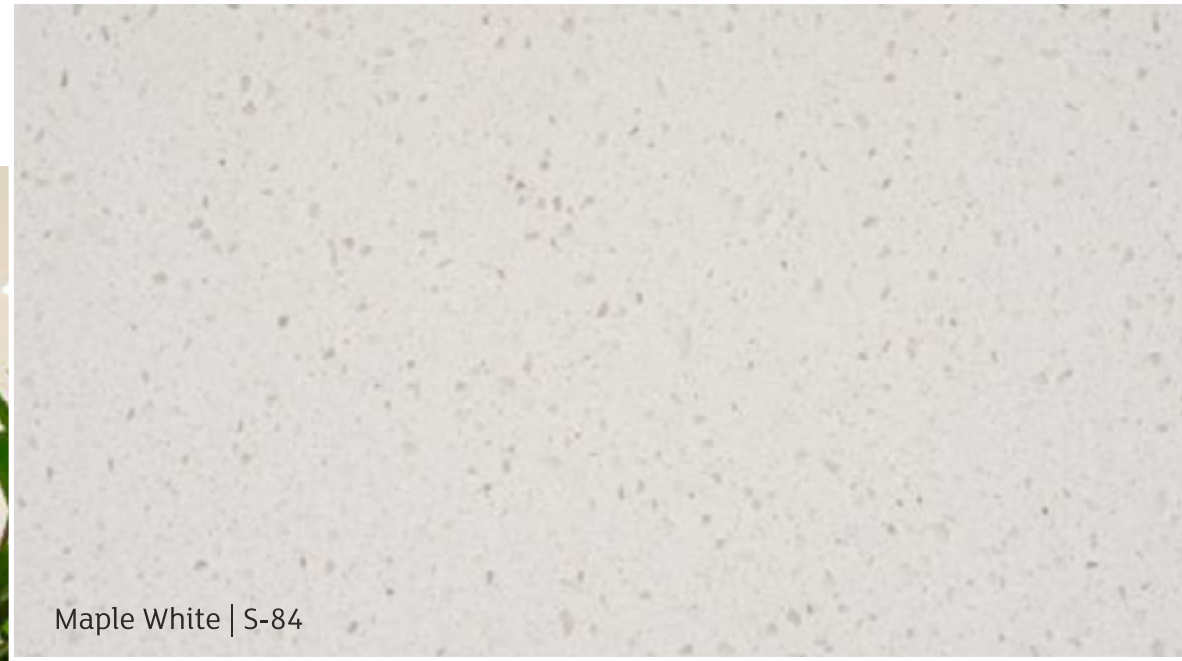

Quartz Slabs is the coming together of nature and engineering. One of the hardest and most abundant minerals found in Earth, natural quartz when mixed with polymer resin (standard ratio: 93% raw quartz to 7% polymer resin) results in an engineered stone that is as beautiful as traditional materials like granite but exceeds in performance advantages.

Being non-porous, quartz slabs are immune to bacteria adding hygiene to your kitchen and room. Plus, it's highly resistant to everyday stains from beverages, food, make-up etc. giving it its forever fresh feel. Furthermore, it comes in a pleasing colour palette that gives any designer ample room to play with and get the guests talking by turning a simple space into quite a sight.

Its versatility, long-life, many colour options and multiple textures make it the most customisation-friendly decor stone that can be translated into beautiful interpretations. If one is looking for a surface stone that adds both life and character to a kitchen, bathroom, room or elsewhere, quartz slabs are a treat engineered to please.

Like all fine materials, Creative Quartz responds best when handled with due care and attention. Remember, it is always easier to wipe up a spill than it is to handle a dried-on stain. Just wipe away any spilled food before it turns into a permanent stain.

Remember that detergents containing bleach and hard scouring granules may harm surfaces over time. Therefore, pay due attention in your detergent selection by never using cleaning products that contain soft or hard scouring granules such as Vim Scouring Powder or Cif Cream.

Products with pH close to neutral or with reduced pH effect (general cleaning products which may be commercially available on shelves) may be used at all times. However, prolonged contact with decalcifiers and products containing decalcifying agents as well as oil solvents and products containing oil solvents must be avoided.

Gently scrape away a plastic spatula any spills of paint, nail enamel, chewing gum, mustard and grease that become hard to remove when dried. Then cleanse the surface with water. Quartz, being one of the hardest minerals on earth, offers Creative Quartz an unparalleled strength and durability that prevent easy scratching and damage.

Before using any cleaning or protecting agent, it is necessary to test it on a small area for the suitability.
