LIMESTONE is the result of millions of years accumulation of shells and skeletons of marine animals on the ocean floor. The calcium in the bones and shells combines with carbon dioxide in the water to form calcium carbonate, which is the basic mineral structure of the stone.

CHELSEA GREY is a durable dense stone you can use for any application. Its sophisticated Gray Taupe color makes a perfect choice for a modern industrial design. With the rising trend of natural and eco-style elements, there is plenty of attention to earth colors.

APPLICATIONS

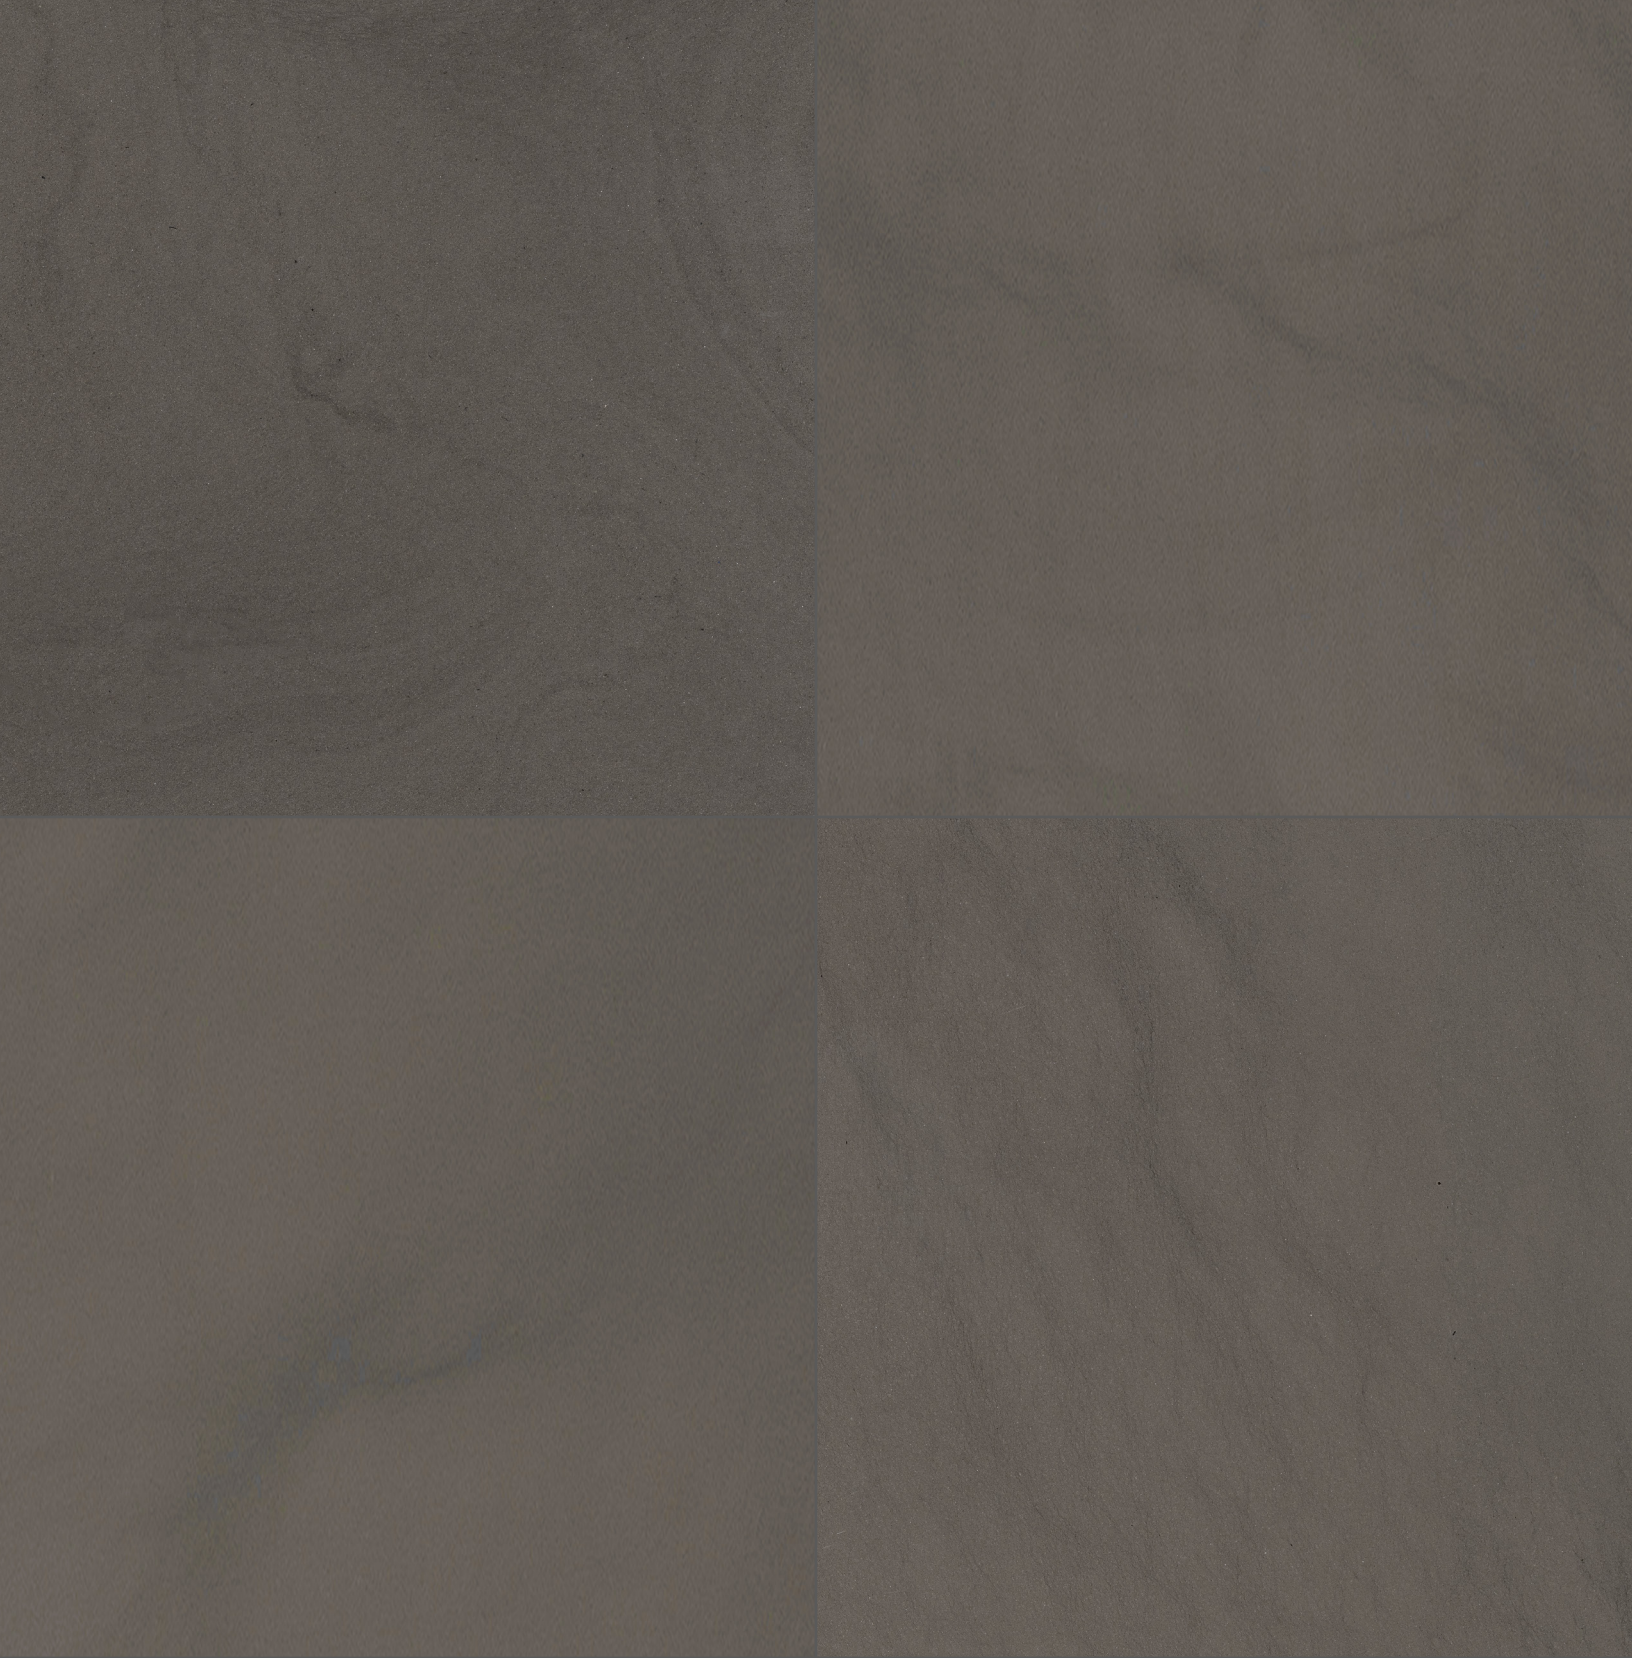

RESIDENTIAL, COMMERCIAL
Floors/Walls, Interior/Exterior, Wet Area (When Properly sealed), (No Steam Shower), (No pools).

*Trims not suitable for floor application.
