PAVERS

Natural Stone Pavers are excellent building products available in different materials and finishes. Durable and versatile, pavers will bring form and function to your property while complementing your landscape's natural components.

They are great for creating pathways, decks, patios, steppingstones, outdoor hospitality areas and pool surrounds.

Contemporary outdoor living takes a controlled and minimalistic approach with clean lines, smooth poolside surfaces and a monochromatic palette. Tumbled finish, natural texture and color variation provides a rustic, antiqued look.

It is important to consider climate conditions before making your selections. Regions with heavy precipitation call for textured pavers. Hot desert weather should opt for pavers that can withstand extremes of temperature. Choose a paver that complements your architectural style instead of competing with it.

APPLICATIONS

Pathways, decks, patios, outdoor hospitality areas, sidewalks, steppingstones, water features, and pool surrounds.

COPING refer to the protective cap or lid at the top of the wall that gives a finished look and protects the wall from the elements. It's used largely the same way in pool design.

COLUMN - WALL CAPS are the rectangle/square shaped quarried natural stone that provides the finishing touch to a retaining wall, fence, or any other similar structure. In general, the cap is bigger than the wall to provide for an overhang.

APPLICATIONS Residential, Commercial, Masonry Walls, Columns, Landscaping, Steps & Pools.
