

SLATE

# SLATE

- Slate is a fine-grained rock composed of a mixture of minerals that creates a rich palette of depth and color. Which include shades of gray and black to a full range of earthy tones.
- NSR's Slate versatile collection includes Indian and Brazilian tiles, mosaics and trims. Our tiles come in a range of 12x12, 12x24, 16x16, 24x24 and Versailles pattern sets, all in a gauged finish.
- Slate is known for its foliated appearance and cleft surface which is caused by pressure forcing long platy minerals to align in layers.
- Slate is an ideal material for enhancing outdoor or indoor spaces, whether as a striking focal point or a harmonious backdrop that blends with natural surroundings. Its rustic charm, durability and unique appearance make it a superb choice for both exterior and interior design.
- Slate marketing displays include 3x6 samples, library boards 7x7 and 7x14 ID cards, 12X24 displays and catalogs.
