

THIN VENEER

THIN VENEER

- A curated NSR natural stone wall veneer collection developed around design flexibility, practical quantities, and ease of specification.
- Thin Veneer is available in both flats and corners, each with a Random Sizes – Sawn Back for consistent installation.
- Flats are packaged in practical 50 sq. ft. crates, allowing projects to purchase closer to what they need without the larger quantities commonly imposed by the industry.
- The collection’s natural finish and versatile color palette give designers a purposeful range of choices, moving from soft, understated lights through deeper darks to distinctive, vibrant honey-gold tones. Each color can support a specific design direction while preserving the authentic character and variation of natural stone.
- Designed exclusively for wall applications, THIN VENEER transitions easily between residential and commercial environments from facades, pillars and feature walls to fireplaces and landscape design.
- A complete marketing and specification program supports the collection with loose samples, 24” × 24” display boards and a catalog, making it easier for designers and clients to experience the material, color, texture, and variation before specifying.
